European Symposium on Ambulatory Anaesthesia

This first AAA symposium for ambulatory anaesthesia under the patronage of ESA shall foster the collaboration and relationships between surgeons, anaesthetists and day care personnel and to strengthen interdisciplinary competencies.

Besides the lectures on case scenarios and innovations there are various opportunities for problem solving discussions.

Our goals:

- “in somno securitas” - Safe In Sleep. Reaching this multidisciplinary goal in operating theatres is our vision.
- Sharing best practices and innovations in ambulatory anaesthesia from anaesthetists and surgeons for anaesthetists and surgeons.

Fees
